

**Spinal nerve**

(31 pair)

anterior  
ramus

posterior  
ramus

arranged in  
groups called  
plexuses.

cervical  
↓  
phrenic

brachial  
↓  
axillary,  
musculocutaneous  
/ radial  
/ median  
/ ulnar

Lumbar  
↓  
obturator  
/ femoral

sacral  
↓  
sciatic  
(largest nerve)

main  
branch →

Grayish-white cylindrical structure.

8 cervical  
12 thoracic  
5 lumbar  
5 sacral  
1 coccygeal

**Spinal cord** → shorter than the spine.
